PROFILE

Mechanical Engineer with hands-on experience in 3D CAD, CNC manufacturing, and system design. Proficient in SolidWorks, AutoCAD, and MATLAB. Strong background in DFM, robotics, and FEA with proven success in reducing prototyping time and optimizing fabrication workflows. Passionate about automation, robotics, and product development.

EXPERIENCE

Design Engineer | Openco International | Dec 2024 – Present

- Designed industrial oven and cyclone separation systems with integrated filtration and airflow optimization.
- Applied DFM principles to reduce prototyping time by **30%** and improve fabrication accuracy.
- Delivered production-ready 3D models, BOMs, and technical documentation.

Product Designer Trainee | Meklet Metal Technology Pvt Ltd | Oct – Dec 2024

- Developed precision sheet metal components and optimized CNC cutting using **CYPCUT**, reducing material waste by **15%**.
- Supported end-to-end product development and design validation.

EDUCATION

B. Tech – Mechanical Engineering | Pandit Deendayal Energy University, India | Jul 2024

Full Scholarship (Study in India Program) | CPI: 7.59/10

Relevant Courses: Robotics, Machine Design, FEA, Control Systems.

PROJECTS

- Vibration Control of Flexible Link – Reduced vibration amplitude by 60% using piezo actuators (MATLAB, SolidWorks).
- Bell Crank Lever Optimization – Enhanced load capacity by 30% via stress analysis.
- Natural Convection Simulation – Modeled fluid flow and heat transfer behavior in MATLAB.

SKILLS

SolidWorks | AutoCAD | MATLAB | FEA | CNC Manufacturing | Sheet Metal Design | DFM | Robotics

CERTIFICATIONS

Industrial Robotics Workshop | Technical Support Fundamentals | Advanced English Certificate
